

Obsolete Link / Obsolete Software Version

The version of Channel D software referenced from the website where you clicked to download it is not the current version. A later version is available.

Please download the latest version from the official Channel D download page:

<http://www.channld.com/dwnldpg.html>

This happened because many software update - type websites aren't always diligent in keeping their links updated to our latest software. Only the Channel D website is guaranteed to always have the latest version. We are sorry for any inconvenience.

Thank you,

Channel D Support
